ABOUT ME

I am a B.Tech student majoring in Computer Science and Engineering, with a strong interest in Cloud Computing, Machine Learning, Artificial Intelligence, and Data Analysis. I've worked on several projects in these areas and love exploring how technology can solve real-world problems. I'm naturally curious and pick up new concepts quickly, and I enjoy diving into the details, whether it's in my code or creative work. Also proficient in Project Management and Planning Skills

KEY COMPETENCIES

Team Collaboration	Documentation and presenting	Strong interpersonal skills
Canva, PowerPoint infographic design	Critical thinking skills	Creativity & Innovation
Analytical & Problem-Solving Abilities	Good communication skills	Adaptability & Learning Agility

EDUCATION

Gayatri Vidya Parishad College of Engineering for Women	2022 - 2026
Bachelor of Technology Computer Science and Engineering	7.34 CGPA

CERTIFICATIONS & TECHNICAL TRAINING

Artificial Intelligence & Machine Learning

- Machine Learning – IIPE, Visakhapatnam
- Artificial Intelligence – Corizo
- Machine Learning – Corizo

Cloud & Development

- AWS Cloud Virtual Internship – EduSkills
- Azure Fundamentals - Microsoft Certified
- Google Cloud Cybersecurity Virtual Internship – EduSkills
- Salesforce Developer Virtual Internship – Smart Internz
- Python Essentials 1 & 2 – Cisco Networking Academy
- MERN Stack Project Development – CCC Digital India Pvt Ltd
- Full Stack Development using Java

Design

- Graphic Designing – Corizo

EXTRACURRICULAR ACTIVITIES

Interests:

- Reading (Novels & Fiction)
- self help book and books on History

Sports:

- Chess (Active Player)
- Badminton
- Carrom

Languages Spoken

- Telugu (Native)
- English (Professional Proficiency)

TECHNICAL SKILLS AND KNOWLEDGE

> Programming Languages: - basic C++ and Understanding, Python, - R	> Technologies & Concepts: - Operating Systems, - Data Structures & Algorithms (DSA), - NLP, - Machine Learning Models, - Blockchain	> Design & Presentation Tools: - Canva, - Microsoft PowerPoint, - Excel, - Figma
> Frameworks & Technologies: - Spring Boot, .NET, - MERN Stack, - Salesforce	> Cloud Platforms: - Google Cloud Platform (GCP) - Microsoft Azure	> Tools & IDEs: Eclipse, VS Code, jupyter notebook, Windsurf

Google SkillBoost Achievements

Earned badges in Cloud Infrastructure, Data Science, Machine Learning, and Generative AI through Google SkillBoost labs. Hands-on experience with Google Cloud Console, Vertex AI, and BigQuery ML.

PROJECTS

1. SPOTIFY SONGS' GENRE SEGMENTATION:

- The Spotify Songs' Genre Segmentation project groups songs into meaningful clusters using audio features (e.g., danceability, energy, tempo, valence) and metadata. By applying clustering techniques, it enhances music data organization and supports personalized recommendations and user discovery. Technologies Used: Python, NumPy, Pandas, Scikit-learn, Matplotlib, Seaborn, K-Means, PCA, DBSCAN, Hierarchical Clustering.

2. Laptop Rental CRM (Salesforce)

- Developed a Salesforce-based CRM to manage laptop rentals, customer data, and transactions. Implemented custom objects, reports, dashboards, validation rules, and triggers to automate booking processes, email notifications, and dynamic pricing, improving efficiency and data accuracy.

3. CARDIOVASCULAR DISEASE PREDICTION:

- This project focuses on building a predictive model for cardiovascular diseases using machine learning. With cardiovascular conditions accounting for 28.1% of global deaths, the goal is to enable early diagnosis and treatment through accurate and data-driven predictions. It showcases the practical application of data analysis and machine learning to address a critical real-world health issue. Technologies Used: Python, NumPy, Pandas, Scikit-learn, Matplotlib, Seaborn, PCA, KNN, Decision Trees, Logistic Regression, Random Forest.

4. Smart Campus Portal (MERN Stack Project)

- Developed a full-stack campus management platform with role-based dashboards for Students, Faculty, and Admin. Integrated real-time chat (Socket.io), IT Helpdesk, Notice Board, and Resource Booking System. Built with React.js, Node.js, Express.js, MongoDB, and JWT authentication.

5. Sopera Florals - Cloud-Based E-commerce Platform (.NET + Azure)[Collaborative Project]

- Sopera Florals – Cloud-Based E-commerce Platform (.NET + Azure) Developed a scalable e-commerce platform using ASP.NET Core and React for customized floral products. Deployed backend on Microsoft Azure App Service with Azure SQL Database for efficient data management. Integrated Azure Blob Storage and implemented secure authentication for seamless user experience

6. AgriChain

- Built an IoT, ML, and blockchain-based system for real-time freshness monitoring and traceability. Used MQ-135 & DHT11 sensors with XGBoost (98.8% accuracy) to predict VQI and shelf life, detecting spoilage 12–18 hours early with secure, tamper-proof data storage.

7. Doctor Appointment System(Full Stack Project using Java)

- Built a Spring Boot web application for managing hospital appointments, enabling patient booking and doctor schedule management. Developed RESTful APIs and integrated MySQL for secure, efficient data handling. Technologies: Java, Spring Boot, REST APIs, MySQL, HTML, CSS, JavaScript

8. Advocate Appointment System

- Designed and implemented an Advocate Appointment System using Spring Boot to facilitate efficient client-lawyer consultation scheduling. The system allows clients to register, submit case details, and book appointments, while advocates manage availability and client records. Developed REST APIs and ensured secure data handling with backend validation. Technologies: Java, Spring Boot, REST APIs, MySQL, HTML, CSS, JavaScript

STRENGTHS & INTERESTS

- Quick learner with strong analytical and problem-solving abilities.
- Adaptable team player with effective communication and collaboration skills.
- Keen interest in emerging technologies such as IoT, Machine Learning, Blockchain, and Cloud Computing.
- Passionate about frontend design, UI/UX development, and digital content creation.
- Engages in freelance video editing and invitation designing for functions and events.
